Check the appropriate box below if the Form 8-K filing is intended to simultaneously satisfy the filing obligation of the registrant under any of the following provisions:

☐ Written communications pursuant to Rule 425 under the Securities Act (17 CFR 230.425)

☐ Soliciting material pursuant to Rule 14a-12 under the Exchange Act (17 CFR 240.14a-12)

☐ Pre-commencement communications pursuant to Rule 14d-2(b) under the Exchange Act (17 CFR 240.14d-2(b))

☐ Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol(s)	Name of each exchange on which registered
Common Stock, $0.001 par value	**REI**	**NYSE American**

Indicate by check mark whether the registrant is an emerging growth company as defined in Rule 405 of the Securities Act of 1933 (§230.405 of this chapter) or Rule 12b-2 of the Securities Exchange Act of 1934 (§240.12b-2 of this chapter).
Emerging growth company ☐

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Item 2.02 Results of Operations and Financial Condition.

On November 5, 2026, Ring Energy, Inc. (the "Company") issued a press release announcing its financial and operating results for the third quarter ended September 30, 2026. A copy of the press release is furnished herewith as Exhibit 99.1.

The information in this Current Report on Form 8-K furnished pursuant to Item 2.02, including Exhibit 99.1, shall not be deemed to be "filed" for the purposes of Section 18 of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), or otherwise subject to liability under that section, and they shall not be deemed incorporated by reference in any filing under the Securities Act of 1933, as amended (the "Securities Act"), or the Exchange Act, except as shall be expressly set forth by specific reference in such filing.

Item 7.01 Regulation FD Disclosure.

On November 6, 2026, the Company posted to its website a company presentation (the "Presentation Materials") that management intends to use from time to time. The Company may use the Presentation Materials, possibly with modifications, in presentations to current and potential investors, lenders, creditors, vendors, customers and others with an interest in the Company and its business.

The information contained in the Presentation Materials is summary information that should be considered in the context of the Company's filings with the Securities and Exchange Commission and other public announcements that the Company may make by press release or otherwise from time to time. The Presentation Materials speak as of the date of this Current Report on Form 8-K. While the Company may elect to update the Presentation Materials in the future or reflect events and circumstances occurring or existing after the date of this Current Report on Form 8-K, the Company specifically disclaims any obligation to do so. The Presentation Materials are furnished herewith as Exhibit 99.2 to this Current Report on Form 8-K and are incorporated herein by reference.

The information in this Current Report on Form 8-K furnished pursuant to Item 7.01, including Exhibit 99.2, shall not be deemed to be "filed" for the purposes of Section 18 of the Exchange Act, or otherwise subject to liability under that section, and they shall not be deemed incorporated by reference in any filing under the Securities Act or the Exchange Act, except as shall be expressly set forth by specific reference in such filing. By filing this Current Report on Form 8-K and furnishing this information pursuant to Item 7.01, the Company makes no admission as to the materiality of any information in this Current Report on Form 8-K, including Exhibit 99.2, that is required to be disclosed solely by Regulation FD.

Item 9.01 Financial Statements and Exhibits.

(d) Exhibits.

The following exhibits are included with this Current Report on Form 8-K:

Exhibit No.	Description
99.1	Press Release dated November 5, 2026
99.2	Presentation Materials dated November 6, 2026

RING ENERGY REPORTS THIRD QUARTER 2026 RESULTS, UPDATES GUIDANCE AND ADVANCES DISCIPLINED PORTFOLIO STRATEGY

Monetized Non-Core Assets, Added Core Acreage While Advancing Higher-Return Development Program and Reducing Debt

The Woodlands, TX – November 5, 2026 – Ring Energy, Inc. (NYSE American: REI) ("Ring" or the "Company") today reported operational and financial results for the third quarter of 2026 and provided an update on its guidance, development program, portfolio optimization initiatives and balance sheet.

During the third quarter, Ring continued to execute its strategy of improving its capital efficiency and the quality of its asset portfolio while strengthening its balance sheet. The Company completed approximately $30.5 million of non-core asset sales, acquired approximately $18.8 million of leasehold interests in the Central Basin Platform ("CBP") and reduced borrowings under its revolving credit facility by $10.0 million. The acquired leasehold is positioned within Ring's existing CBP operating footprint, supporting the Company's strategy of expanding higher-return development inventory while increasing financial flexibility. Subsequent to the quarter, on October 30th, Ring closed another divestiture of non-core assets in Gaines and Andrews Counties for ~ $13.4 million.

Third Quarter 2026 Highlights

(Comparisons are to the second quarter of 2026 unless otherwise noted.)

Delivered Higher Adjusted Earnings Despite Lower Realized Oil Prices

- Generated $102.3 million of revenue, down ~ 2% from $104.7 million, primarily reflecting lower realized oil prices;
- Realized oil price of $83.72 per barrel, down ~ 12%;
- Reported net loss of $16.6 million, or $0.06 per diluted share, including a $41.0 million unrealized loss on commodity derivative contracts;
- Adjusted Net Income[1] of $27.3 million, or $0.10 per diluted share, up ~ 14% from $24.0 million;
- Adjusted EBITDA[1] of $57.1 million, up ~ 5% from $54.5 million despite lower realized oil prices; and
- Net cash provided by operating activities of $63.1 million.

High-Graded Portfolio and Strengthened Balance Sheet

- Completed non-core asset divestitures of ~ 130 barrels of oil equivalent per day ("Boe/d") (63% oil) and ~ 9.8k net acres for ~ $30.5 million;
- Acquired ~ 16.5k net acres for $18.8 million of leasehold interests in the CBP, expanding Ring's core development footprint by over 25% in Crane and Ector Counties; and
- Reduced borrowings under the Company's revolving credit facility by $10.0 million to $350.0 million at September 30, 2026, while improving LQA leverage ratio to 1.5x from 1.7x.

Advanced Higher-Return Development Program

- Sales volumes of ~ 20,635 Boe/d, including ~ 12,818 barrels of oil per day ("Bo/d"), up approximately 3% and 1%, respectively;
- Brought online first 2-mile horizontal wells and drilled nine YTD;
- Reduced drilling and completion costs[2] to ~ $475 per foot YTD; and
- Invested ~ $64.0 million, reflecting the deliberate acceleration of drilling and infrastructure investments to transition to a more capital-efficient program.

Continued Cost Discipline

- Reported lease operating expense ("LOE") of $10.20 per Boe, below the mid-point of guidance;
- Interest expense of $7.7 million, down ~ 23% year-over-year, reflecting lower debt balances; and
- Reduced all-in-cash costs by 3% to $21.03 per Boe.

Subsequent Events and Updating Guidance

- On October 30th, closed a divestiture of non-core assets in Gaines and Andrews Counties for ~ $13.4 million representing ~470 Boe/d (77% oil) of production;
- Q4 2026 oil production guidance range of 12,900 to 13,500 Bopd and total sales range of 20,400 to 21,200 Boepd;
- Q4 2026 LOE per Boe guidance range of $9.80 to $10.30; and
- Updating 2027 guidance pro forma for divestitures.

Management Commentary

Paul D. McKinney, Chairman of the Board and Chief Executive Officer, commented:

“This was an exciting and highly productive quarter for Ring. We delivered strong operational results, advanced our longer-lateral development program and took decisive steps to improve the depth and quality of our portfolio. In a single quarter, we monetized approximately $30.5 million of non-core assets, added strategic acreage in the heart of our Central Basin Platform position and reduced debt by $10.0 million.

With strong commodity prices, encouraging well performance and the cash surplus from asset dispositions, we deliberately chose to outspend adjusted free cash flow this quarter to accelerate our program. Having said that, we have not lost our focus on capital discipline – we intend to be cash flow positive during the fourth quarter and for the full year. We are proud of what our team accomplished so far this year and remain focused on debt reduction and improving our leverage ratio metrics.

Operationally, we grew production 3% from the second quarter and kept lease operating expense below the mid-point of our guidance range while drilling eight horizontal wells and completing seven, including our first five, 2-mile co-developed laterals in Crane County. These results reinforce our confidence in the development program and demonstrate the execution capability of our team.

The acreage we acquired is particularly compelling because it expands our inventory within an area we know well, where we already operate and where we see attractive opportunities to generate strong returns. By selling assets that were not expected to compete for near-term capital, we effectively recycled capital from lower-priority assets into higher-quality inventory while also strengthening the balance sheet. We believe this is a compelling example of how disciplined capital allocation can strengthen Ring and create stockholder value. We intend for this to be an integral part of our strategy going forward.

We entered 2026 focused on moving Ring into its next phase with greater capital efficiency, and the progress we made this quarter represents an important step forward. We have a stronger portfolio with a deeper inventory of low break-even development opportunities and greater financial flexibility. We are energized by the momentum across the business and believe Ring is increasingly well positioned to deliver durable and competitive, per-share value for our stockholders.”

[1] A non-GAAP financial measure; see the “Non-GAAP Financial Information” section in this release for more information including reconciliations to the most comparable GAAP measures.
[2] D&C Cost is drilling, completion, equipment and connect to facility costs per lateral foot. 2026 excludes shorter lateral test wells.

(1) A summary listing of the Company’s outstanding derivative positions as of November 5, 2026 is included in the tables shown later in this release. As of November 5, 2026, for the remainder (October through December) of 2026, the Company has approximately 1.0 million barrels of oil (approximately 81% of oil sales guidance midpoint) hedged at an average upside protection price of $74.10 and approximately 1.2 billion cubic feet of natural gas (approximately 61% of natural gas sales guidance midpoint) hedged at an average downside protection price of $3.93.

(2) Not meaningful.

Balance Sheet and Liquidity

Total liquidity (defined as cash and cash equivalents plus borrowing base availability under the Company's credit facility) at September 30, 2026 was approximately $236.4 million, consisting of $235.0 million of availability under our revolving credit facility, which included a reduction of $35 thousand for letters of credit, and approximately $1.5 million in cash and cash equivalents. On September 30, 2026, the Company had $350 million in borrowings outstanding on its credit facility that has a current borrowing base of $585 million. This reflects a reduction of $10 million from the balance of $360 million at June 30, 2026. The Company intends to continue debt reduction, dependent on market conditions, the timing and level of capital spending, and other considerations.

Drilling and Completion Activity

In 3Q 2026, the Company drilled a total of eight and completed a total of seven horizontal producing wells. Additionally, the Company completed the SWD well that was in the process of being drilled at the end of the second quarter. In the Central Basin Platform in Andrews County, the Company drilled and completed two 1.5-mile horizontal wells, both with a working interest of approximately 99%. In the Central Basin Platform in Crane County, the Company drilled six and completed five 2-mile horizontal wells, each with a working interest of 100%.

The table below sets forth Ring's drilling and completion activities in the first nine months of 2026:

Quarter	Area	Wells Drilled	Wells Completed	Drilled Uncompleted ("DUC")
1Q 2026	Northwest Shelf (Horizontal)	5	5	—
	Central Basin Platform (Horizontal) [1]	—	1	—
	Central Basin Platform (Vertical)	1	1	—
	Total	6	7	—
2Q 2026	Northwest Shelf (Horizontal)	2	2	—
	Central Basin Platform (Horizontal)	5	2	3
	Total	7	4	3
3Q 2026	Central Basin Platform (Horizontal)	8	7	4
	Total [2]	8	7	4

(1) The horizontal well completed in the Central Basin Platform in the first quarter of 2026 is the completion of a previously drilled but uncompleted ("DUC") well.

(2) The total does not include the SWD well that was completed in the third quarter of 2026.

Remaining Quarter of 2026 and Full-Year 2027 Sales Volumes, Capital Investment and Operating Expense Guidance

Since providing its original 2026 development outlook, Ring has continued to refine its development plan towards horizontal drilling and allocate capital toward its highest-return opportunities. This evolution reflects encouraging early well results, improved operational execution and the attractive economics associated with extended-reach laterals. Ring believes the increased concentration of longer lateral opportunities has the potential to enhance capital efficiency, improve project economics and support the Company's strategy of generating higher returns while responsibly growing production.

The guidance in the table below represents the Company's current good faith estimate of the range of likely future results. Guidance could be affected by the factors discussed below in the "Safe Harbor Statement" section.

	Q4 2026 UPDATED	FY 2027 UPDATED
Sales Volumes:		
Total Oil (Bo/d)	12,900 - 13,500	13,200 - 14,300
Total (Boe/d)	20,400 - 21,200	21,000 - 23,000
Oil (%)	63%	63%
NGLs (%)	20%	20%
Gas (%)	17%	17%
Capital Program:		
Capital spending[(1)] (millions)	$43 - $48	$135 - $165
New >1.5 mile lateral wells drilled	5	20 - 30
Wells completed and online	5	20 - 30
DUC wells	4	0
Operating Expenses:		
LOE (per Boe)	$9.80 - $10.30	$9.70 - $10.50

[(1)] In addition to Company-directed drilling and completion activities, the capital spending outlook includes funds for targeted well recompletions, capital workovers, infrastructure upgrades, and well reactivations. Also included is anticipated spending for leasing acreage; and non-operated drilling, completion, capital workovers, and facility improvements.

Conference Call Information

Ring will hold a conference call on Friday, November 6, 2026 at 11:00 a.m. ET (10 a.m. CT) to discuss its 3Q 2026 operational and financial results. An updated investor presentation will be posted to the Company's website prior to the conference call.

To participate in the conference call, interested parties should dial 833-953-2433 at least five minutes before the call is set to begin. Please reference the "Ring Energy 3Q 2026 Earnings Conference Call". International callers may participate by dialing 412-317-5762. The call will also be webcast and available on Ring's website at www.ringenergy.com under "Investors" on the "News & Events" page. An audio replay will also be available on the Company's website following the call.

About Ring Energy, Inc.

Ring Energy, Inc. is an oil and gas exploration, development, and production company with current operations focused on the development of its Permian Basin assets. For additional information, please visit www.ringenergy.com.

Safe Harbor Statement

This release contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Forward-looking statements involve a wide variety of risks and uncertainties, and include, without limitation, statements with respect to the Company's strategy and prospects. The forward-looking statements include statements about the expected future reserves, production, financial position, business strategy, revenues, earnings, costs, capital expenditures and debt levels of the Company, and plans and objectives of management for future operations. Forward-looking statements also include assumptions and projections for remainder of 2026 and 2027 guidance for sales volumes, oil, NGL and natural gas mix as a percentage of total sales, capital expenditures, wells drilled, operating expenses and the projected impacts thereon. Forward-looking statements are based on current expectations and assumptions and analyses made by Ring and its management in light of their experience and perception of historical trends, current conditions and expected future developments, as well as other factors appropriate under the circumstances. However, whether actual results and developments will conform to expectations is subject to a number of material risks and uncertainties, including but not limited to: declines in oil, natural gas liquids or natural

gas prices; the level of success in exploration, development and production activities; the impact of worldwide political, military and armed conflict (including the impact of the ongoing conflict with Iran and the closure of the Strait of Hormuz); adverse weather conditions that may negatively impact development or production activities particularly in the winter; the timing of exploration and development expenditures; inaccuracies of reserve estimates or assumptions underlying them; revisions to reserve estimates as a result of changes in commodity prices; impacts to financial statements as a result of impairment write-downs; risks related to level of indebtedness and periodic redeterminations of the borrowing base and interest rates under the Company's credit facility; Ring's ability to generate sufficient cash flows from operations to meet the internally funded portion of its capital expenditures budget; the impacts of hedging on results of operations; changes in U.S. energy, environmental, monetary, tax and trade policies, including with respect to tariffs or other trade barriers, and any resulting trade tensions; cost and availability of transportation and storage capacity as a result of oversupply, government regulation or other factors; and Ring's ability to replace oil and natural gas reserves. Such statements are subject to certain risks and uncertainties which are disclosed in the Company's reports filed with the Securities and Exchange Commission ("SEC"), including its Form 10-K for the fiscal year ended December 31, 2025, and its other SEC filings. Ring undertakes no obligation to revise or update publicly any forward-looking statements, except as required by law.

(1) The gas basis swap hedges are calculated as the Henry Hub natural gas price less the fixed amount specified as the weighted average spread price above.

RING ENERGY, INC.
Non-GAAP Financial Information

Certain financial information included in this release are not measures of financial performance recognized by accounting principles generally accepted in the United States ("GAAP"). These non-GAAP financial measures are "Adjusted Net Income," "Adjusted EBITDA," "Adjusted Free Cash Flow" or "AFCF," "Adjusted Cash Flow from Operations" or "ACFFO," "G&A Excluding Share-Based Compensation," "G&A Excluding Share-Based Compensation and Transaction Costs," "Leverage Ratio," "Consolidated Total Debt to LQA Consolidated EBITDAX," "All-In Cash Operating Costs," and "Cash Operating Margin." Management uses these non-GAAP financial measures in its analysis of performance. These disclosures may not be viewed as a substitute for results determined in accordance with GAAP and are not necessarily comparable to non-GAAP performance measures which may be reported by other companies.

Reconciliation of Net income (loss) to Adjusted Net Income

"Adjusted Net Income" is calculated as net income (loss) minus the estimated after-tax impact of share-based compensation, ceiling test impairment, unrealized gains and losses on changes in the fair value of derivatives, and transaction costs for acquisitions and divestitures ("A&D"). Adjusted Net Income is presented because the timing and amount of these items cannot be reasonably estimated and affect the comparability of operating results from period to period, and current period to prior periods. The Company believes that the presentation of Adjusted Net Income provides useful information to investors as it is one of the metrics management uses to assess the Company's ongoing operating and financial performance, and also is a useful metric for investors to compare the Company's results with its peers.

Reconciliation of Net income (loss) to Adjusted EBITDA

The Company defines “Adjusted EBITDA” as net income (loss) plus net interest expense (including interest income and expense), unrealized loss (gain) on change in fair value of derivatives, ceiling test impairment, income tax (benefit) expense, depreciation, depletion and amortization, asset retirement obligation accretion, transaction costs for acquisitions and divestitures (A&D), share-based compensation, loss (gain) on disposal of assets, and backing out the effect of other income. Company management believes Adjusted EBITDA is relevant and useful because it helps investors understand Ring’s operating performance and makes it easier to compare its results with those of other companies that have different financing, capital and tax structures. Adjusted EBITDA should not be considered in isolation from or as a substitute for net income, as an indication of operating performance or cash flows from operating activities or as a measure of liquidity. Adjusted EBITDA, as Ring calculates it, may not be comparable to Adjusted EBITDA measures reported by other companies. In addition, Adjusted EBITDA does not represent funds available for discretionary use.

(1) Adjusted EBITDA Margin is calculated as Adjusted EBITDA divided by Oil, Natural Gas, and Natural Gas Liquids Revenue.

Reconciliations of Net Cash Provided by Operating Activities to Adjusted Free Cash Flow and Adjusted EBITDA to Adjusted Free Cash Flow

The Company defines "Adjusted Free Cash Flow" or "AFCF" as Net Cash Provided by Operating Activities (as reflected on the Company's Condensed Statements of Cash Flows) less changes in operating assets and liabilities, and plus transaction costs for acquisitions and divestitures ("A&D"), current income tax expense (benefit), proceeds from divestitures of oil and natural gas properties, loss (gain) on disposal of assets, and less capital expenditures, credit loss expense, and other income. For this purpose, the Company's definition of capital expenditures includes costs incurred related to oil and natural gas properties (such as drilling and infrastructure costs and lease maintenance costs) but excludes acquisition costs of oil and gas properties from third parties that are not included in the Company's capital expenditures guidance provided to investors. Management believes that Adjusted Free Cash Flow is an important financial performance measure for use in evaluating the performance and efficiency of the Company's current operating activities after the impact of capital expenditures and net interest expense (including interest income and expense, excluding amortization of deferred financing costs) and without being impacted by items such as changes associated with working capital, which can vary substantially from one period to another. Other companies may use different definitions of Adjusted Free Cash Flow.

(1) Proceeds from divestitures of oil and natural gas properties for purposes of Adjusted Free Cash Flow excludes proceeds of $30.5 million from the sale of certain non-core assets for the three and nine months ended September 30, 2026.

Reconciliation of Net Cash Provided by Operating Activities to Adjusted Cash Flow from Operations

The Company defines “Adjusted Cash Flow from Operations” or “ACFFO” as Net Cash Provided by Operating Activities, as reflected in the Company’s Condensed Statements of Cash Flows, less the changes in operating assets and liabilities, which includes accounts receivable, inventory, prepaid expenses and other assets, accounts payable, and settlement of asset retirement obligations, which are subject to variation due to the nature of the Company’s operations. Accordingly, the Company believes this financial performance measure is useful to investors because it is used often in its industry and allows investors to compare this metric to other companies in its peer group as well as the E&P sector.

Calculation of Leverage Ratio

“Leverage” or the “Leverage Ratio” is calculated pursuant to the Company’s existing senior revolving credit facility and means as of any date, the ratio of (i) Consolidated Total Debt as of such date to (ii) Consolidated EBITDAX for the four consecutive fiscal quarters ending on or immediately prior to such date for which financial statements are required to have been delivered under the credit facility.

The Company defines “Consolidated Total Debt” in accordance with its existing senior revolving credit facility and means, as of any date, all Indebtedness of the Company on a consolidated basis as of such date, but excluding hedging obligations.

The Company defines “Indebtedness” in accordance with its existing senior revolving credit facility and generally means (i) all obligations of the Company for borrowed money, (ii) all obligations of the Company evidenced by notes or other similar instruments, (iii) all obligations of the Company in respect of the deferred purchase price of property or services, (iv) all obligations of the Company under any conditional sale relating to property acquired the Company, (v) all capital lease obligations of the Company, (vi) all obligations, contingent or otherwise, of the Company in respect of letters of credit or similar extensions of credit, (vii) all guarantees of the Company of the type of Indebtedness described in clauses (i) through (vi) above, (viii) all Indebtedness of a third party secured by any lien on property owned by the Company, whether or not such Indebtedness has been assumed by the Company, (ix) all off-balance sheet liabilities, (x) all hedging obligations and (xi) the undischarged balance of any production payment created by the Company or for the creation of which the Company directly or indirectly received payment.

The Company defines “Consolidated EBITDAX” in accordance with its existing senior revolving credit facility and means for any period an amount equal to the sum of (i) consolidated net income (loss) for such period plus (ii) to the extent deducted in determining consolidated net income (loss) for such period, and without duplication, (A) consolidated interest expense, (B) income tax expense (benefit) determined on a consolidated basis, (C) depreciation, depletion and amortization determined on a consolidated basis, (D) exploration expenses determined on a consolidated basis, and (E) all other non-cash charges reasonably acceptable to the administrative agent, in each case for such period minus (iii) all noncash income added to consolidated net income (loss) for such period; provided that, for purposes of calculating compliance with the financial covenants under the credit facility, to the extent that during such period the Company has consummated an acquisition permitted by the credit facility or any sale, transfer or other disposition of any property or assets permitted by the credit facility, Consolidated EBITDAX will be calculated on a pro forma basis with respect to the property or assets acquired or disposed of.

The maximum permitted Leverage Ratio under the senior revolving credit facility is 3.00. The following tables show the leverage ratio calculations for the quarters ended September 30, 2026 and September 30, 2025.

Calculation of Consolidated Total Debt to LQA Consolidated EBITDAX

The Company defines Consolidated Total Debt to LQA Consolidated EBITDAX as Consolidated Total Debt divided by LQA ("Last Quarter Annualized") Consolidated EBITDAX. Consolidated Total Debt and Consolidated EBITDAX are defined pursuant to the Company's existing senior revolving credit facility. The Company believes this metric is more reflective of its current leverage ratio profile by annualizing Consolidated EBITDAX for the most recent period. Consolidated Total Debt to LQA Consolidated EBITDAX and Consolidated EBTIDAX are non-GAAP financial measures and may not be comparable to similarly titled measures used by other companies and should not be considered as a substitute for measured prepared in accordance with GAAP. Therefore, the Company believes it is important to view this ratio and Consolidated EBITDAX as supplemental to its entire financial statements.

	Three Months Ended September 30, 2026
Consolidated Total Debt	$ 352,092,752
Consolidated EBITDAX	57,201,029
LQA Consolidated EBITDAX	$ 228,804,116
Consolidated Total Debt to LQA Consolidated EBITDAX	**1.5**

All-In Cash Operating Costs

The Company defines All-In Cash Operating Costs, a non-GAAP financial measure, as "all in cash" costs which includes lease operating expenses, G&A costs excluding share-based compensation, net interest expense (including interest income and expense, excluding amortization of deferred financing costs), workovers and other operating expenses, production taxes, ad valorem taxes, and gathering/transportation costs. Management believes that this metric provides useful additional information to investors to assess the Company's operating costs in comparison to its peers, which may vary from company to company.

	(Unaudited for All Periods)				
	Three Months Ended			Nine Months Ended	
	September 30, 2026	June 30, 2026	September 30, 2025	September 30, 2026	September 30, 2025
All-In Cash Operating Costs:					
Lease operating expenses (including workovers)	$ 19,367,227	$ 18,409,462	$ 20,518,472	$ 55,899,033	$ 60,442,005
G&A excluding share-based compensation	6,549,559	5,804,634	6,521,171	18,268,163	19,236,869
Net interest expense (excluding amortization of deferred financing costs)	6,913,384	7,540,170	9,284,442	22,288,486	27,306,249
Operating lease expense	124,187	175,090	175,091	474,368	525,272
Oil and natural gas production taxes	4,584,698	5,047,619	3,670,987	13,186,208	11,088,049
Ad valorem taxes	2,210,911	2,202,160	2,446,565	6,615,608	5,627,320

Forward-Looking Statements and Supplemental Non-GAAP Financial Measures

Forward-Looking Statements

This Presentation includes forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. All statements, other than statements of historical fact included in this Presentation, regarding our strategy, future operations, financial position, estimated revenues and losses, projected costs, prospects, guidance, plans and objectives of management are forward-looking statements. When used in this Presentation, the words "could," "may," "will," "believe," "anticipate," "intend," "estimate," "expect," "guidance," "project," "goal," "plan," "potential," "probably," "strategy," "target" and similar expressions are intended to identify forward-looking statements, although not all forward-looking statements contain such identifying words. Forward-looking statements also include assumptions and projections for 2026 and 2027 guidance for sales volumes, number of potential well locations and associated inventory life, oil, NGL and natural gas mix as a percentage of total sales, capital expenditures, and operating expenses and the projected impacts thereon, and the number of wells expected to be drilled and completed. These forward-looking statements are based on management's current expectations and assumptions about future events and are based on currently available information as to the outcome and timing of future events. However, whether actual results and developments will conform to expectations is subject to a number of material risks and uncertainties, including but not limited to: declines in oil, natural gas liquids or natural gas prices; the level of success in exploration, development and production activities; adverse weather conditions that may negatively impact development or production activities particularly in the winter; the timing of exploration and development expenditures; inaccuracies of reserve estimates or assumptions underlying them; revisions to reserve estimates as a result of changes in commodity prices; impacts to financial statements as a result of impairment write-downs; risks related to level of indebtedness and periodic redeterminations of the borrowing base and interest rates under the Company's credit facility; Ring's ability to generate sufficient cash flows from operations to meet the internally funded portion of its capital expenditures budget; the impacts of hedging on results of operations; the effects of future regulatory or legislative actions; cost and availability of transportation and storage capacity as a result of natural gas oversupply, changes in U.S. energy, environmental, monetary and trade policies, including with respect to tariffs or other trade barriers, and any resulting trade tensions; political instability or armed conflict in major oil and natural gas producing regions outside the United States, including military hostilities in the Middle East (including the recent conflict between the United States and Iran), Russia, and Ukraine; and Ring's ability to replace oil and natural gas reserves. Such statements are subject to certain risks and uncertainties that are disclosed in the Company's reports filed with the Securities and Exchange Commission ("SEC"), including its Form 10-K for the fiscal year ended December 31, 2025, and its other filings with the SEC. All forward-looking statements, expressed or implied, included in this Presentation are expressly qualified by the cautionary statements and by reference to the underlying assumptions that may prove to be incorrect.

The Company undertakes no obligation to revise these forward-looking statements to reflect events or circumstances that arise after the date hereof, except as required by applicable law. The financial and operating estimates contained in this Presentation represent our reasonable estimates as of the date of this Presentation. Neither our independent auditors nor any other third party has examined, reviewed or compiled the estimates and, accordingly, none of the foregoing expresses an opinion or other form of assurance with respect thereto. The assumptions upon which the estimates are based are described in more detail herein. Some of these assumptions inevitably will not materialize, and unanticipated events may occur that could affect our results. Therefore, our actual results achieved during the periods covered by the estimates will vary from the estimated results. Investors are not to place undue reliance on the estimates included herein.

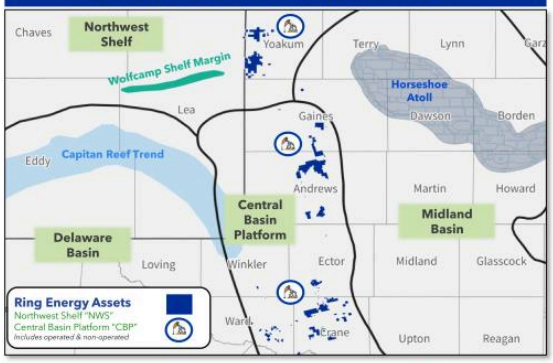

Supplemental Non-GAAP Financial Measures

This Presentation includes financial measures that are not in accordance with accounting principles generally accepted in the United States ("GAAP"), such as "Adjusted Net Income", "Adjusted EBITDA," "PV-10," "Adjusted Free Cash Flow" or "AFCF," "Adjusted Cash Flow from Operations" or "ACFFO," "Cash Return on Capital Employed" or "CROCE," "Leverage Ratio," "Consolidated Total Debt to LQA Consolidated EBITDAX," "All-in Cash Operating Costs," and "Cash Operating Margin." While management believes that such measures are useful for investors, they should not be used as a replacement for financial measures that are in accordance with GAAP. See Appendix for definitions and reconciliation to GAAP measures.

Ring: A Differentiated Permian Company

An operated conventional Permian company with scale, inventory depth and a long-life production base.

OPERATED PERMIAN POSITION

96K+ Net Acres | **99%** Operated | **10+** Proven Pay Zones

RING ENERGY AT A GLANCE

SCALE		ASSET LONGEVITY		Leverage Ratio[1]
20 MBoepd Production	**$1.3B** Proved PV-10	**20+ yrs** Reserve Life	**10+ yrs** Development Inventory	**1.5x** LQA Leverage[2]

20% **PDP Decline**
Long-Life Production Base

CAPITAL STRUCTURE & LIQUIDITY[3]

$1.43	260.5MM	~$370MM	$350MM	~$720MM	$236MM
Share Price	Shares Outstanding	Market Capitalization	Total Debt	Enterprise Value	Liquidity

1. Leverage ratio is a Non-GAAP financial measure. See Appendix for definitions and reconciliation to GAAP measures.
2. "LQA" is Consolidated Total Debt to LQA Consolidated EBITDAX as of September 30, 2026. See Appendix for reconciliation of Non-GAAP financial measures to GAAP measures.
3. Market data is as of October 30, 2026. Balance sheet data is as of September 30, 2026.

A Disciplined Framework for Capital Allocation

We allocate capital to maximize long-term per-share value while maintaining balance sheet strength and flexibility through commodity cycles.

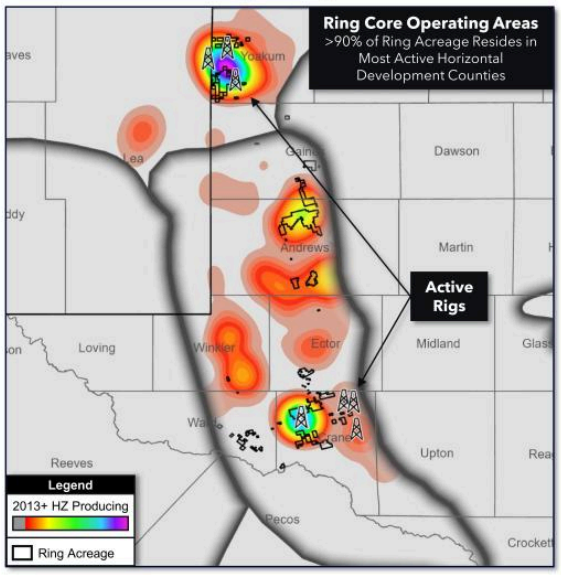

Q3 PORTFOLIO ACTIONS REFLECT THIS FRAMEWORK IN PRACTICE

1. Leverage ratio is a Non-GAAP financial measure. See Appendix for definitions and reconciliation to GAAP measures.

Ring's Acreage in Core Development Areas

Horizontal development is expanding the opportunity across Ring's conventional asset base.

Horizontal Activity Across Ring's Core Operating Areas

Horizontal Development has Accelerated Across Ring's Core Counties

- Pre 2015 – **infancy of horizontal tech**
- Post 2015 - ~**1,200+ horizontal wells** drilled on core CBP & NWS counties
- **CBP & NWS resurgence** pioneered by horizontals drilled by Ring, Riley Permian, Blackbeard, Burk Royalty & Elevation
- **Multi-Bench Hz targets** include: Judkins, McKnight, Glorieta, Upper Clearfork, Tubb, Wichita Albany, Wolfcamp, Barnett & Devonian

Ring 2026E New Drills >80% Horizontal[1] with Increased Lateral Length

Source: Enverus as of April 27, 2026.
1. Guidance Midpoint.

Q3 2026: Upgrading the Portfolio & Executing Plan

Monetized non-core assets at accretive valuations, expanded core inventory and reduced debt.

✓ Continued Operational Discipline

- Brought online Company's first 2-mile co-development wells
- Reduced drilling and completion costs to ~ $475 per lateral foot
- LOE of $10.20 per Boe
  (Below the mid-point of guidance)
- All-in-Cash Operating Costs[1] of $21.03 per Boe
  (3% improvement QoQ)

✓ Expanded Core Inventory

- Leased ~16,500 net acres in core operating areas in the Central Basin Platform for $18.8MM
- Increased Crane & Ector County footprint by ~25%, adding long-lateral locations adjacent to existing operations

✓ Monetized Non-Core Assets

- Generated $30.5MM from two non-core asset sales
- Capitalized on higher oil prices to sell assets at accretive, premium valuations
- Accelerated value from non-core assets

✓ Strengthened Balance Sheet

- Reduced debt by $10MM
- Maintained significant liquidity
- Leverage approximately 1.5x LQA EBITDAX[2]

1. All-in-Cash Operating Costs is a Non-GAAP financial measure. See Appendix for definition and reconciliation to GAAP measures.
2. Ratio of leverage calculated as Consolidated Total Debt to LQA Consolidated EBITDAX as of September 30, 2026. See Appendix for reconciliation of Non-GAAP financial measures to GAAP measures.

Q3 2026 Expanded Core Inventory and Reduced Debt

Non-Core Asset Sales

$30.5MM

Monetized non-core assets to redeploy capital into core inventory and reduce debt

Portfolio Upgrade

$18.8MM

Leasehold acquisitions within Ring's existing operating footprint

Debt Reduction

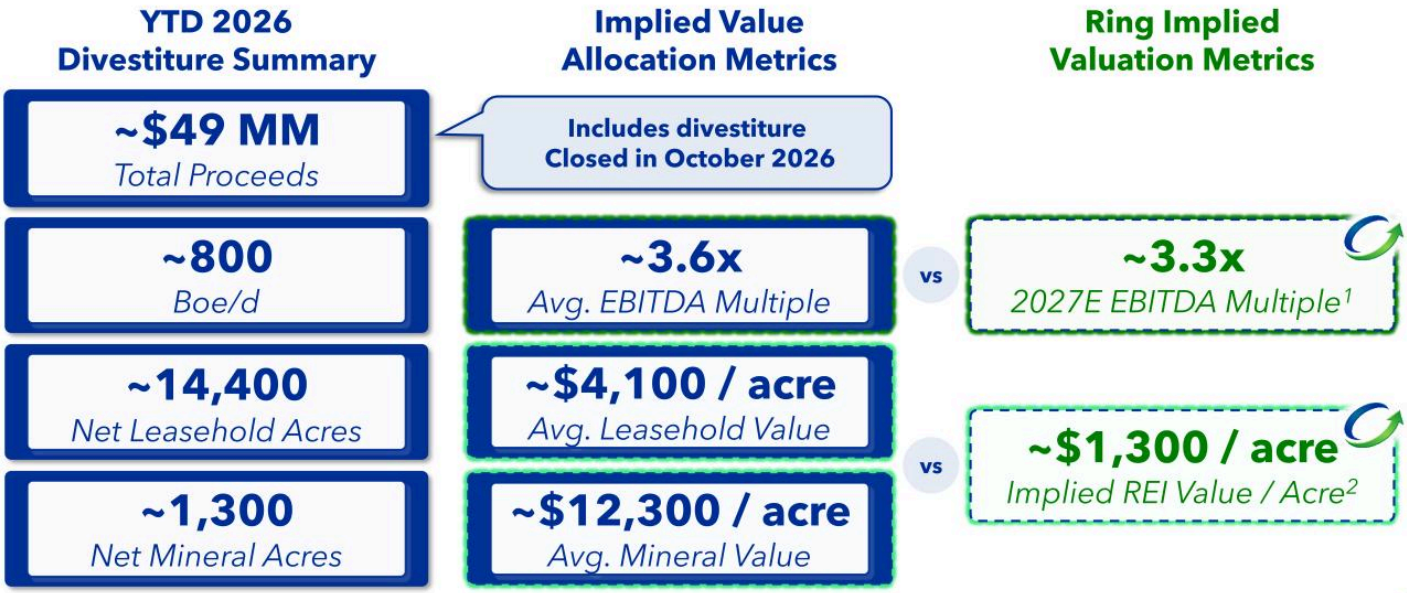

$10.0MM

HIGHER-QUALITY INVENTORY + **LOWER LEVERAGE** = A STRONGER RING ENERGY

Creating Value Through Active Portfolio Management

Successful divestitures capture attractive value that helped pay down debt.

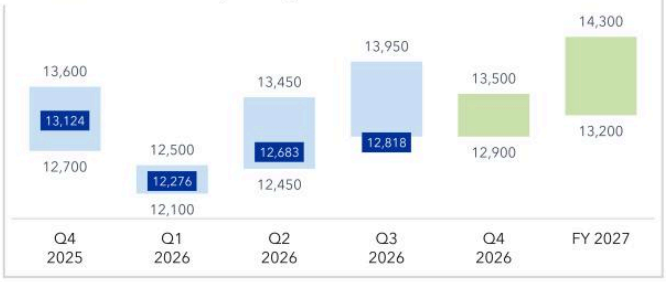

CONSISTENTLY CAPTURING ATTRACTIVE VALUE FROM NON-CORE[3] ASSETS

1. Analyst median 2027 EBITDA estimate as of 10/30/2026.
2. $/acre value calculated using $30,000/boe to approximate production value.
3. Non-Core assets include select assets in Yoakum, Gaines, Andrews, Crane, Ward, and Ector Counties.

Q3 2026 Actuals & Updated Q4 26E & 27E Guidance

Guidance Range | Actuals | Guidance

Oil Sales Volumes (Bo/d)

LOE (per Boe)

Total Sales Volumes (Boe/d)

Capital per Quarter[1] ($MM)

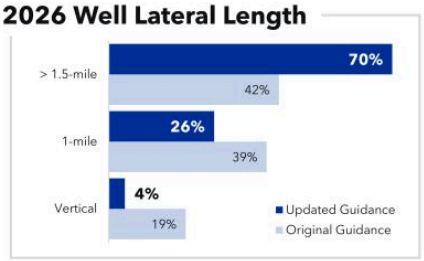

1. In addition to Company-directed drilling and completion activities, the capital spending outlook includes funds for targeted well recompletions, capital workovers, infrastructure upgrades, and well reactivations. Also included is anticipated spending for leasing acreage; and non-operated drilling, completion, capital workovers, and facility improvements.

Updated Guidance (Continued)

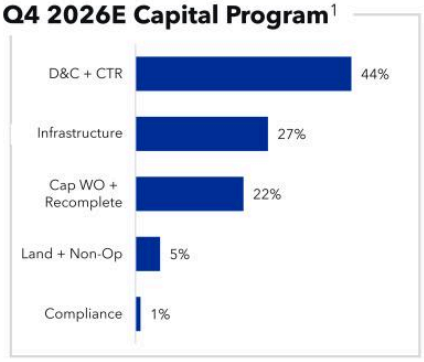

Post divestures

Sales Volumes	Q4 2026E Update	FY 2027E Update
Total (Bo/d)	12,900 – 13,500	13,200 – 14,300
Total (Boe/d)	20,400 – 21,200	21,000 – 23,000
– Oil (%)	63%	63%
– NGLs (%)	20%	20%
– Gas (%)	17%	17%
Capital Program		
Capital[1] ($MM)	$43 – $48	$135 - $165
– >1.5-mile Hz wells drilled	5	20 to 30
– >1.5-mile Hz wells brought online	5	20 to 30
– DUC wells (complete in Q1 '27)	4	-
Operating Expenses		
LOE (per Boe)	$9.80 – $10.30	$9.70 - $10.50

2026 Well Lateral Length

Q4 2026E Capital Program[1]

1. In addition to Company-directed drilling and completion activities, the capital spending outlook includes funds for targeted well recompletions, capital workovers, infrastructure upgrades, and well reactivations. Also included is anticipated spending for leasing acreage; and non-operated drilling, completion, capital workovers, and facility improvements.

Meaningful Upside to Adjusted Free Cash Flow[1,2]

2026 hedges support the development plan while unhedged and collar volumes give exposure to upside.

Realized Price vs. After-Hedge Realized Price ($/Boe)

2026E & 2027E Adjusted Free Cash Flow[1,2]

Daily Hedge Volumes (Bbl/d)[3]

1. Adjusted Free Cash Flow is a Non-GAAP financial measure. See Appendix for definition and reconciliation to GAAP measures.
2. Estimated AFCF is based on projections of internal management financial model and assumes mid point of guidance for "net sales", LOE & capex with flat WTI oil price beginning in December 2026 $3.50 per MCF Flat. Differential assumptions oil (-$1.00), gas (-$3.75), and NGL realizations of 15% of WTI oil price.
3. Q1 2027 includes 33 Bbl/d of $62.50 x $73.65 collars; Q3 2027 includes 358 Bbl/d of $60.00 x $72.30 collars; Q4 2027 includes 363 Bbl/d of $60.00 x 72.30 collars.

Ring Energy's Strategic Advantage

A Leader Redefining Conventional Assets Through Unconventional Thinking & Modern Technology to Deliver Sustainable Returns

- A Proven Cash Flow Machine: **Over 6 Consecutive Years of Positive AFCF**[1]
- Conventional Asset Advantage: **Shallow Decline, High Margin and Long Life**
- Drilling Inventory: **10+ years with 500+ Identified Locations**[2]
- Disciplined Consolidator in the Heart of the Permian: **3rd Largest E&P in CBP Texas**[3]
- Nimble Operator: **High NRIs, Stacked Pay Zones with Multi-bench Hz Potential**

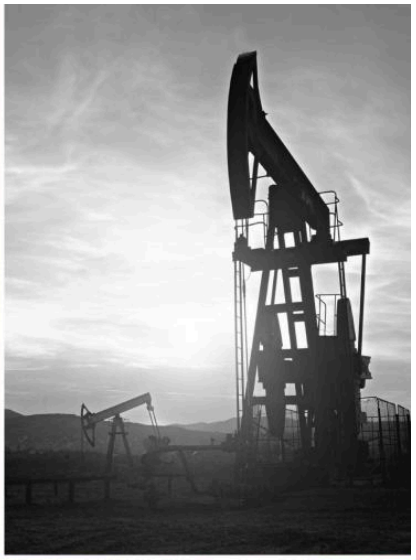

1. Adjusted Free Cash Flow is a Non-GAAP financial measure. See Appendix for definition and reconciliation to GAAP measures.
2. Defined as locations that can generate at least a 10% rate of return at $60 per Bbl oil and $2.50 per Mcf gas prices.
3. Source Enverus trailing twelve months as of Dec. 2025 for operators' Gross production on per Boe basis in the Texas CBP & NWS.

RING ENERGY

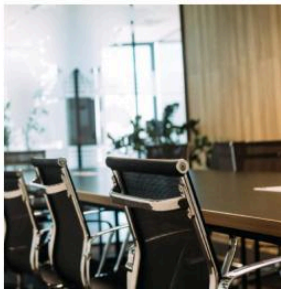

Q3 2026 EARNINGS | NOVEMBER 6, 2026

OPERATIONAL IMPROVEMENTS

www.ringenergy.com | NYSE American: REI

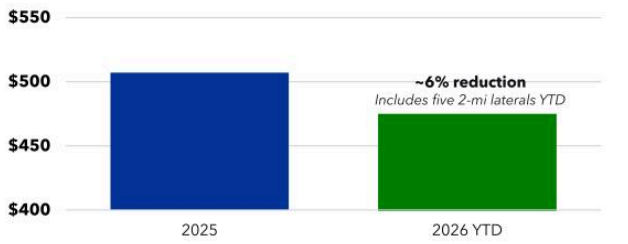

Operational Excellence

Driving sustainable free cash flow through capital efficiency and ongoing reductions to operating costs.

Reducing Hz D&C Cost Per Lateral Foot[1]

Structural Reduction in Monthly LOE $MM

Hz Well EUR Oil & Boe per Lateral Foot[2]

Reducing LOE $ per Boe

1. D&C Cost is drilling, completion, equipment and connect to facility costs per lateral foot. 2026 excludes shorter lateral test wells.
2. EUR = estimated ultimate recovery based on internal Q3 estimates. Total horizontal well counts per year 2025 (12) and YTD 2026 (13).

Significant Reduction in Cash Costs

Structural cost cutting initiatives expected to drive sustainable cash cost improvement through YE 2027.

Cash Cost Savings ($ / BOE) Bridge

Total Operating Improvements: >$1.30 / BOE
~$10MM in Annual Savings[1]

1. Operating Cost Actions

- LOE optimization
- Proactively renegotiate agreements to lower rates
- Reduce well failure rates with chemical treatment
- Increase efficiency of well workover program

2. Corporate Efficiency

- Reduce debt to lower interest expense
- Organizational efficiency
- Technology rationalization
- Corporate overhead discipline

3. Capital & Infrastructure

- Facilities optimization
- Continuous well design improvement
- Multi-pad, multi-well development
- Water infrastructure

1. Illustrative annual savings calculated assuming 20,000 Boe of daily production.

Investing Today to Enhance Future Returns

Infrastructure investments lower future development costs, improve well-level economics and enhance returns across future drilling programs.

Frac Pond
Water Storage
Reduces sourcing costs and completion cycle times

$2 to $3 MM

Central Tank Batteries
Built ahead of development
Reduces Future Facility Capital per Well

$3 to $5 MM

Salt-Water Disposal
Multi-Well Infrastructure
Improves Flow Assurance and Reduces Water Handling Costs

$2 to $5 MM

Upfront Infrastructure Investment

↓

Lower Development Costs and Improved Reliability

↓

Higher Well-Level Returns / More Efficient Capital Allocation

↓

Increased Free Cash Flow and Financial Flexibility

↓

Increased Stockholder Value

Expected Future D&C Cost Savings[1]

~$50 - $100 per foot

1. Expected future D&C cost savings per foot is for 2H 2026E & 27E Hz development wells over 1.5 miles.

Strengthening the Business Through Cost Discipline

Operational cost improvements continue to enhance margins and free cash flow generation.

Q3 All-in Cash Op. Costs[1] per Boe

$21.03

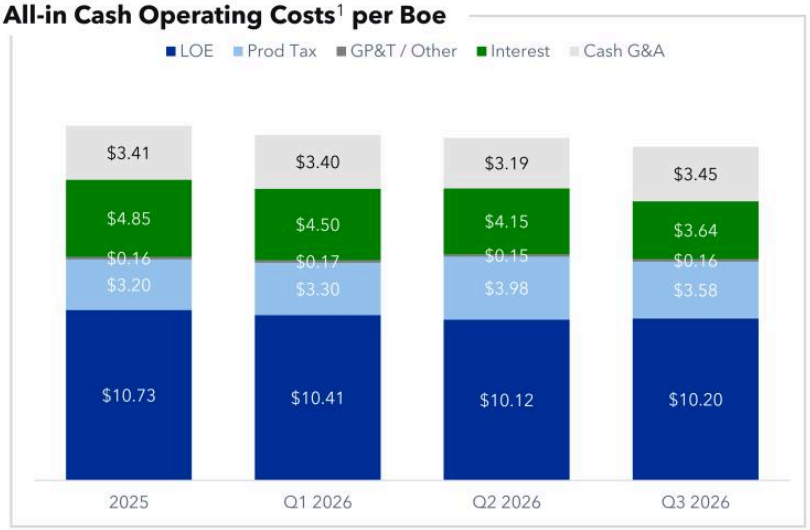

3% below Q2 2026
39% of realized price

Q3 LOE per Boe

$10.20

49% of total cash costs

All-in Cash Operating Costs[1] per Boe

1. All-in Cash Operating Costs is an Non-GAAP financial measure. See Appendix for definition and reconciliation to GAAP measures.

Potential Catalysts for 2026 & Beyond

- Organically Grow High-Quality Inventory and Reserves
- Further Strengthen Balance Sheet and Increase Financial Flexibility
- Ongoing Cost and Capital Efficiency Gains
- Substantial Upside, Proved Reserves Trading Discount and Increasing Commodity Prices

(1) The gas basis swap hedges are calculated as the Henry Hub natural gas price less the fixed amount specified as the weighted average spread price above.

The Company has hedged:

Bal2026: **~ 1.2 BCF of natural gas** at avg **downside protection price of $3.93**
2027: **~ 4.4 BCF of natural gas** at avg **downside protection price of $3.81**

Non-GAAP Disclosure

Certain financial information included in this Presentation are not measures of financial performance recognized by accounting principles generally accepted in the United States ("GAAP"). These non-GAAP financial measures are "Adjusted Net Income," "Adjusted EBITDA," "Adjusted Free Cash Flow" or "AFCF," "Adjusted Cash Flow from Operations" or "ACFFO," "Cash Return on Capital Employed" or "CROCE," "PV-10," "Leverage Ratio," "Consolidated Total Debt to LQA Consolidated EBITDAX," "All-in Cash Operating Costs," and "Cash Operating Margin." Management uses these non-GAAP financial measures in its analysis of performance. In addition, CROCE is a key metric used to determine a portion of the Company's incentive compensation awards. These disclosures may not be viewed as a substitute for results determined in accordance with GAAP and are not necessarily comparable to non-GAAP performance measures which may be reported by other companies.

"Adjusted Net Income" is calculated as net income (loss) minus the estimated after-tax impact of share-based compensation, ceiling test impairment, unrealized gains and losses on changes in the fair value of derivatives, and transaction costs for acquisitions and divestitures ("A&D"). Adjusted Net Income is presented because the timing and amount of these items cannot be reasonably estimated and affect the comparability of operating results from period to period, and current period to prior periods. The Company believes that the presentation of Adjusted Net Income provides useful information to investors as it is one of the metrics management uses to assess the Company's ongoing operating and financial performance, and also is a useful metric for investors to compare the Company's results with its peers.

The Company defines "Adjusted EBITDA" as net income (loss) plus net interest expense (including interest income and expense), unrealized loss (gain) on change in fair value of derivatives, ceiling test impairment, income tax (benefit) expense, depreciation, depletion and amortization, asset retirement obligation accretion, transaction costs for acquisitions and divestitures (A&D), share-based compensation, loss (gain) on disposal of assets, and backing out the effect of other income. Company management believes Adjusted EBITDA is relevant and useful because it helps investors understand Ring's operating performance and makes it easier to compare its results with those of other companies that have different financing, capital and tax structures. Adjusted EBITDA should not be considered in isolation from or as a substitute for net income, as an indication of operating performance or cash flows from operating activities or as a measure of liquidity. Adjusted EBITDA, as Ring calculates it, may not be comparable to Adjusted EBITDA measures reported by other companies. In addition, Adjusted EBITDA does not represent funds available for discretionary use.

The Company defines "Adjusted Free Cash Flow" or "AFCF" as Net Cash Provided by Operating Activities (as reflected on the Company's Condensed Statements of Cash Flows) less changes in operating assets and liabilities, and plus transaction costs for acquisitions and divestitures ("A&D"), current income tax expense (benefit), proceeds from divestitures of oil and natural gas properties, loss (gain) on disposal of assets, and less capital expenditures, credit loss expense, and other income. For this purpose, the Company's definition of capital expenditures includes costs incurred related to oil and natural gas properties (such as drilling and infrastructure costs and lease maintenance costs) but excludes acquisition costs of oil and gas properties from third parties that are not included in the Company's capital expenditures guidance provided to investors. Management believes that Adjusted Free Cash Flow is an important financial performance measure for use in evaluating the performance and efficiency of the Company's current operating activities after the impact of capital expenditures and net interest expense (including interest income and expense, excluding amortization of deferred financing costs) and without being impacted by items such as changes associated with working capital, which can vary substantially from one period to another. Other companies may use different definitions of Adjusted Free Cash Flow.

The Company defines "Adjusted Cash Flow from Operations" or "ACFFO" as Net Cash Provided by Operating Activities, as reflected in the Company's Condensed Statements of Cash Flows, less the changes in operating assets and liabilities, which includes accounts receivable, inventory, prepaid expenses and other assets, accounts payable, and settlement of asset retirement obligations, which are subject to variation due to the nature of the Company's operations. Accordingly, the Company believes this financial performance measure is useful to investors because it is used often in its industry and allows investors to compare this metric to other companies in its peer group as well as the E&P sector.

The table below provides detail of PV-10 to the standardized measure of discounted future net cash flows as of December 31, 2025. ($ in 000's)

Present value of estimated future net revenues (PV-10)	$	1,318,208
Future income taxes, discounted at 10%	$	194,715
Standardized measure of discounted future net cash flows	$	1,123,493

"Leverage" or the "Leverage Ratio" is calculated pursuant to the Company's existing senior revolving credit facility and means as of any date, the ratio of (i) Consolidated Total Debt as of such date to (ii) Consolidated EBITDAX for the four consecutive fiscal quarters ending on or immediately prior to such date for which financial statements are required to have been delivered under the credit facility. The Company defines "Consolidated Total Debt" in accordance with its existing senior revolving credit facility and means, as of any date, all Indebtedness of the Company on a consolidated basis as of such date, but excluding hedging obligations. The Company defines "Consolidated EBITDAX" in accordance with its existing senior revolving credit facility and means for any period an amount equal to the sum of (i) consolidated net income (loss) for such period plus (ii) to the extent deducted in determining consolidated net income (loss) for such period, and without duplication, (A) consolidated interest expense, (B) income tax expense (benefit) determined on a consolidated basis, (C) depreciation, depletion and amortization determined on a consolidated basis, (D) exploration expenses determined on a consolidated basis, and (E) all other non-cash charges reasonably acceptable to the administrative agent, in each case for such period minus (iii) all noncash income added to consolidated net income (loss) for such period; provided that, for purposes of calculating compliance with the financial covenants under the credit facility, to the extent that during such period the Company has consummated an acquisition permitted by the credit facility or any sale, transfer or other disposition of any property or assets permitted by the credit facility, Consolidated EBITDAX will be calculated on a pro forma basis with respect to the property or assets acquired or disposed of. The maximum permitted Leverage Ratio under the senior revolving credit facility is 3.00.

The Company defines "Consolidated Total Debt to LQA Consolidated EBITDAX" as Consolidated Total Debt divided by LQA ("Last Quarter Annualized") Consolidated EBITDAX. Consolidated Total Debt and Consolidated EBITDAX are defined pursuant to the Company's existing senior revolving credit facility. The Company believes this metric is more reflective of its current leverage ratio profile by annualizing Consolidated EBITDAX for the most recent period. Consolidated Total Debt to LQA Consolidated EBITDAX and Consolidated EBTIDAX are non-GAAP financial measures and may not be comparable to similarly titled measures used by other companies and should not be considered as a substitute for measures prepared in accordance with GAAP. Therefore, the Company believes it is important to view this ratio and Consolidated EBITDAX as supplemental to its entire financial statements.

PV-10 is a non-GAAP financial measure that differs from a financial measure under GAAP known as "standardized measure of discounted future net cash flows" in that PV-10 is calculated without including future income taxes. Management believes that the presentation of the PV-10 measure of the Company's oil and natural gas properties is relevant and useful to investors because it presents the estimated discounted future net cash flows attributable to its estimated proved reserves independent of its income tax attributes, thereby isolating the intrinsic value of the estimated future cash flows attributable to its reserves. Management believes the use of a pre-tax measure provides greater comparability of assets when evaluating companies because the timing and quantification of future income taxes is dependent on company-specific factors, many of which are difficult to determine. For these reasons, management uses and believes that the industry generally uses the PV-10 measure in evaluating and comparing acquisition candidates and assessing the potential rate of return on investments in oil and natural gas properties. PV-10 does not necessarily represent the fair market value of oil and natural gas properties. PV-10 is not a measure of financial or operational performance under GAAP, nor should it be considered in isolation or as a substitute for the standardized measure of discounted future net cash flows as defined under GAAP.

The Company defines "Cash Return on Capital Employed" or "CROCE" as Adjusted Cash Flow from Operations divided by average debt and shareholder equity for the period.

The Company defines All-In Cash Operating Costs, a non-GAAP financial measure, as "all in cash" costs which includes lease operating expenses, G&A costs excluding share-based compensation, net interest expense (including interest income and expense, excluding amortization of deferred financing costs), workovers and other operating expenses, production taxes, ad valorem taxes, and gathering/transportation costs. Management believes that this metric provides useful additional information to investors to assess the Company's operating costs in comparison to its peers, which may vary from company to company.

The Company defines Cash Operating Margin, a non-GAAP financial measure, as realized revenues per Boe less "all-in cash operating costs" per Boe. Management believes that this metric provides useful additional information to investors to assess the Company's operating margins in comparison to its peers, which may vary from company to company.
